

Algebra 1R
Chapter 6 Day 1 Homework

Solve by graphing

1. $x - y = 2$
 $y - 3x = -10$

Solve by substitution.

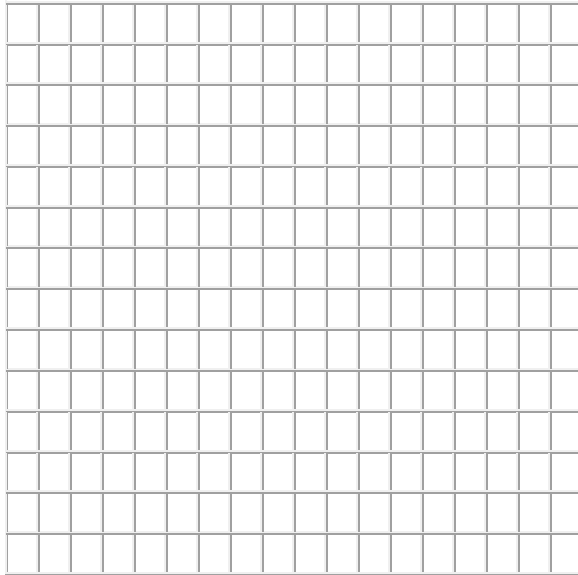

2. $2x + 4y = 7$
 $x + y = 3$

Solve by graphing **and** substitution.

3. $3x + y = 5$
 $x - y = -1$

Graphing

Substitution

4. $y = x - 1$
 $3x - 2y = 6$

Graphing

Substitution
