

How to Use the Class Summary Report

The Class Summary Report is designed to provide teachers with a quick, visual summary of how their class(es) did on a particular assessment.

Accessible from the "Teacher Dashboard," (shown above), this report lists all students in a class and indicates how many points each earned out of the total points available, along with a percentage grade. The mark that was earned by each student will also be displayed and the students' names will be color-coded accordingly. Bold and italics can be used when educators do not have access to a color printer for their data reports. This document can also be run for several different classes.
